PROFESSIONAL SUMMARY

B.Tech AI & ML student at Jain University (CGPA 8.5/10) with hands-on expertise in machine learning, computer vision, and AI-powered application development. Ranked Top 3 of 1,500+ teams at VIBE-athon Hackathon (20,000+ participants) by independently building and deploying a full AI emergency platform in 24 hours. Earned 42 Google Cloud skill badges and 16 Credly-verified credentials through hands-on labs and projects. Built two production-ready AI systems achieving 95% and 92% accuracy respectively.

WORK EXPERIENCE

Tech Co-Lead | Cognito Club, Jain University | 2024 – 2026

- Directed technical operations and built digital platforms used by 50+ active club members
- Organised 3–4 workshops and hackathons, boosting member engagement by **60%** with 100+ student participants
- Guided and assisted 100+ students across events on Python, ML concepts, and problem-solving
- Coordinated 2–3 large-scale club events end-to-end across logistics, content, and technical execution
- Communicated complex AI/ML concepts clearly to non-technical members, faculty, and external stakeholders

PROJECTS

ConnectAid AI – Emergency Assistance Platform | React · Node.js · Google Gemini API | GitHub

■ Hackathon Top 3 — 1,500 teams, 20,000+ participants registered (VIBE-athon, Replit & Polaris)

- Built AI-powered emergency facility discovery achieving **95% location accuracy** via Google Gemini API
- Reduced facility discovery time by **90%** using real-time distance-weighted Google Maps API prioritization
- Architected React frontend + Node.js/Express REST backend with admin dashboard and live alert monitoring
- Integrated Web Speech API for multilingual voice I/O; presented solution to panel of industry judges
- Independently led all technical development end-to-end from architecture to deployment

SmartCart – Intelligent Checkout System | Python · TensorFlow · OpenCV · IoT | GitHub

- Trained CNN product-recognition model with TensorFlow + OpenCV achieving **92% real-time accuracy**
- Reduced checkout time by **40%** via automated product detection and instant price lookup pipeline
- Integrated IoT sensors for live inventory synchronization and automated restock alerts
- Documented as a **research paper submission**; awarded **96/100** academic marks for depth and innovation

TECHNICAL SKILLS

Languages & Frameworks: Python, Java, SQL, React, FastAPI, Node.js, Express.js

ML & AI: TensorFlow, PyTorch, Scikit-learn, CNN, NLP, Computer Vision, Generative AI, Reinforcement Learning, Prompt Engineering

Data & Visualization: Pandas, NumPy, Matplotlib, Seaborn, Tableau, BigQuery, Looker

Databases & Cloud: PostgreSQL, MongoDB, Google Cloud Platform (42 Skill Badges), Vertex AI, Terraform

Tools & DevOps: Git, GitHub, CI/CD, Docker, Linux, Jupyter, Streamlit, REST APIs

Concepts: Data Structures & Algorithms, OOP, Full Stack Development, Problem Solving, Agile

Soft Skills: Leadership, Teamwork, Collaboration, Communication, Adaptability

KEY CERTIFICATIONS

- **Neural Networks & Deep Learning** — DeepLearning.AI, Oct 2025
- **Build ML Web App – Streamlit** — Coursera, Sep 2024
- **Introduction to Computer Vision** — UC Boulder / Coursera, Oct 2025
- **Introduction to DevOps** — IBM, Nov 2024
- **Reinforcement Learning** — MathWorks, Oct 2025
- **Google Cloud – Generative AI / Terraform / BigQuery** — Google Cloud (42 badges), Apr–Jun 2025
- **Probability & Statistics for ML** — DeepLearning.AI, May 2025

AWARDS & CREDENTIALS

■ Hackathon Winner — Top 3 of 1,500 teams, VIBE-athon (Replit & Polaris) | **42 Google Cloud Skill Badges** (Credly-verified) | **100+ LeetCode Problems** solved | **16 Credly Badges** | **Tech Co-Lead** — 60% engagement growth

EDUCATION

B.Tech in Artificial Intelligence & Machine Learning | Jain University, Bengaluru | Aug 2023 – Aug 2027 | CGPA: 8.5 / 10
